

RULES FOR THE CONTEST INVITATION ON SCIENTIFIC WORK OF
CARDIOLOGICAL IMAGES
XXVI WORLD CONGRESS OF ECHOCARDIOGRAPHY AND ALLIED
TECHNIQUES

1. The invitation is addressed to the Peruvian and International Cardiology Community interested in participating.
2. The core of the event is the presentation of a scientific work related to Transthoracic, Transesophageal Echocardiography, Tomography, Nuclear Medicine and / or Magnetic Resonance. The case must be original and not have been published in any media or scientific communication event.
3. The manuscript must be sent to email: worldechoperu20@gmail.com with the subject ABSTRACTS, no later than May 31, 2020.

This will consist of the following parts:

- a. Title: Less than 150 characters including spaces. Avoid abbreviations or acronyms.
- b. Author's page: The authors should not be more than 7, of which should be recorded the following: Full name, specify position (resident or assistant), institution where you work.
- c. Work content: The scientific method contemplates the following components.
 - i. *Summary*. It should not be greater than 300 words. It should not include abbreviations and should consist of: Background Basis, Objectives, Methods, Example, Results and Conclusions
 - ii. *Introduction*
 - iii. *Method*. It covers examples, inclusion criteria, collection and processing.
 - iv. *Results*
 - v. *Discussion*
 - vi. *Conclusion*

d. Bibliography: Maximum of 5 references. References will be sorted according to order of appearance and following the standards of Vancouver 2010.

4. The manuscript will take a maximum of 10 A4-sized double-spaced pages with font size 12. The images will be cited in the text and may include a caption with their interpretation. Statistical tables and graphs should be the representation of the findings.

5. The cases with the highest score will be selected, to be introduced in a presentation (number to be determined by the organizing committee). The grading of the cases will be carried out by a jury made up of members of the International Society of Cardiovascular Ultrasound. The score is described below.

6. The presentation of winning works will be held during the course of the event, at a location designated in the congress. Each participant will have 15 minutes available to do their presentation.

7. Each scientific work will be scored from 1 to 10, in the following aspects:

a. *Originality*: refers to the novel and innovative case and / or the clinical-diagnostic approach applied to it.

b. *Presentation*: refers to the quality of the presentation by the speaker. It involves both the evaluation of the spoken presentation and the content of the written material (PowerPoint).

c. *Images*: refers to the quality and clarity of the images presented.

d. *Coherence*: refers to the degree of correlation between the findings of the different methods, and the type and sequence of the diagnostic methods applied.

e. *Clinical message*: refers to the clinical applicability that arises from the case in question.
